Re: Washington Street Sidewalk Repairs

Dear Property Owners,

The Town of Canton has contracted with New England Infrastructure of Southborough, Mass. to perform necessary safety improvements to the sidewalk in front of 610 – 622 Washington Street. The project consists of the construction of several sections of reinforced concrete and masonry cinder block walls in the basements of the existing businesses to separate the Town's property from private property and to provide for a safe foundation for a new sidewalk.

The contractor is scheduled to begin this work the week of October 24, 2005. Construction activities are expected to last approximately 2 months weather permitting. Vollmer Associates LLP, our engineering consultant, will have a representative on site periodically to monitor the progression of the construction project. Please do not hesitate to direct any questions or concerns you may have to this individual. Further, you may contact Mr. Aaron Chandler or William Mertz, P.E. from Vollmer Associates LLP at 617-451-0044 for questions or concerns.

We appreciate your patience and cooperation in this matter.

Michael Trotta
Superintendent
