

GALVIN MIDDLE SCHOOL BASKETBALL COURTS

Applicant: Canton School Department
Amount Requested: \$35,097

The CCPC voted to recommend CPA funding in the amount of \$35,097 to rehabilitate the outdoor basketball courts at the William H. Galvin Middle School. The two courts at Galvin are becoming unsafe due to cracking and uneven surfaces, and their poor condition has precluded more extensive use. A similar court renovation project was successfully completed at the Kennedy Elementary School in 2019 and the proposed project budget is based on that experience. The School Department has committed to funding project costs in excess of the requested CPA funding. Rehabilitating the courts is a priority project for the School Department and it will allow expanded wellness programming at this site.
